

# A Level Physics

## Course Overview

Physics is the study of the properties and interactions of matter and energy. Our understanding of many features of the everyday world relies on knowledge drawn from the ideas and methods of Physics.

On this course you will study how things work, from subatomic particles to galaxies going through light, electrical and magnetic fields, electric circuits, thermodynamics, and properties of materials. You will study these phenomena in class through theory, experiments and computer simulations.

## What You Will Study

You will study a range of topics including:

- Forces, Motion and Energy
- Gravitational Fields
- Electrical Circuits
- Electric and Magnetic Fields and Their Interactions and Applications
- Wave Behaviour and Quantum Physics
- Circular Motion and Orbits
- Physics
- Thermodynamics
- Material Physics
- Nuclear and Particle Physics

## How You Will Be Assessed

Throughout the course your level of attainment will be gauged by regular tests and homework assignments.

All A-Level exams will take place at the end of the second year of the course. There are three written exams each lasting 2 hours. Overall, at least 40% of the marks in assessments for Physics will require the use of mathematical skills.

## Entry Requirements

5 GCSEs at Grade 9-4, including English Language and Grade 6 in Maths.

PLUS

Dual Science at Grade 6/6.

OR

### START DATE

September

### LEVEL

Level 3

### STUDY MODE

Full-time

### DURATION

2 years

### AWARDING BODY

Assessment &  
Qualifications  
Alliance (AQA)

### LOCATION

Wakefield College

How to  
Apply

Student  
Support

Virtual  
Tours

Separate Sciences, Grade 6 in Physics.

## Further Study

A Level Physics is an excellent qualification for anyone seeking entry to a university and is an essential requirement for physics and engineering courses.

Physics is regarded as a 'facilitating subject' which will increase your chances of progression to a Russell Group University.
