Course Overview

Ready to level up your future?

Forget just playing games and browsing websites – imagine building them! On this dynamic course, you'll dive headfirst into the exciting worlds of game development and web application creation. We're not just talking theory; you'll get your hands dirty from day one, mastering the art and science behind captivating games and interactive websites.

Think designing immersive game worlds and crafting sleek, user-friendly web interfaces. You'll learn the coding secrets that bring these creations to life, unleash your inner artist with animation techniques, and gain invaluable insights into industry-standard design principles.

Our passionate team of industry veterans won't just lecture – they'll mentor you. They'll share their real-world expertise, guiding you through practical, hands-on workshops where "learning by doing" isn't just a phrase, it's how you'll thrive. You'll be using the very same software and techniques the pros use every day.

By the time you complete this course, you won't just have a qualification – you'll have a portfolio bursting with working game projects, ready to be unleashed upon the world if you choose! You'll also gain a deep understanding of the games industry's inner workings, explore the fascinating relationship between humans and computers, and discover the diverse landscape of gaming platforms. Plus, get ready for inspiring visits from guest speakers who are shaping the future of both industry and Higher Education.

Ready to transform your passion into a profession? Let's build your future, one game and web app at a time.

What You Will Study

You will develop assets through different projects to explore game creation processes and techniques.

Our course will teach you the skills you need to create your own games and web applications. You'll learn about game and web design, game and web programming, art, and animation.
