

Level 3 Creative Photography

In Partnership with Connected Campus/Screen Yorkshire

ART, DESIGN &
PHOTOGRAPHY
Wakefield
College

Course Overview

This creative and exciting pathway is aimed at broadening and expanding your photography skills to a very high standard, whilst also allowing development in generic art skills specific to your aspirations, such as drawing, design generation, painting, 3-dimensional design, printmaking, surface design, graphic design, illustration, textiles and digital applications. Working within a creative studio environment and IT suites, you will develop your knowledge, self-confidence, communication, time-management and presentation skills, resulting in a professional portfolio and body of work.

On the course are opportunities to engage with local and national creatives to help widen your perspectives, whilst purpose built facilities at Wakefield College, which includes a dark-room, will enable you to develop your technical skills, preparing you for employment and industry.

What You Will Study

Examples of some of the units you may study are:

- **The creative process:** It is often said that artists and designers follow a creative process when producing their work. This can start with inspiration and include elements of research, experimentation, and refinement, ending with the final realisation. Often artists and designers will use these activities to develop their own ways of working as they explore and cultivate their creative practice.
- **Professional equipment:** Learning how to capture light using professional cameras on manual settings as per industry standards. You will be taught how to use these on location as well as in a purpose-built photographic studio. In addition, you will be taught how to use all the equipment that accompanies a professional photographer including: lighting, tripods, reflectors, mobile flash units, studio flashes, diffuses and props.
- **Analogue photography:** working in the photographic darkroom in order to learn the timeless methods of manual photographic production. Using chemical based analogue photography in our custom-built dark room.
- **Post-production skills and image manipulation using industry standard software:** Adobe Photoshop and Light room and other Adobe products.
- **Art and Design skills:** Students will engage with large variety of photography and mixed media skills taught by discipline specialists in order to creatively adapt your photographic work and learn skills in which to produce high quality and unique final outcomes.
- **Contextual awareness:** Introduction on the importance of research into contextual influences, a professional skill that enables photographers in both in all photographic fields to ensure production of the highest quality of innovative
